

## Multiple-Day On-Site Workshop

### Schedule 6-9 hours of professional development

Our purpose for Multiple-Day On-Site Workshops is to accommodate for your schedule and allow for the maximum contact time within that schedule. We have adapted to provide workshops with the following schedules: two 4-hour days, two or three 3-hour days, one six-hour day followed by a three-hour day. There is a slight increase in costs for multiple days, however, it is easier for you to take advantage of the maximum workshop hours without wearing out teachers on a single day. We are ready to work with you to make professional development a positive experience for all participants and fit it into your schedule.
