

One-Day On-Site Workshop

Schedule up to 8 hours of professional development

Our One-Day On-Site workshops are designed and scheduled to meet your school’s specific goals and needs. We work with each school to make sure the selected workshop addresses your goals and emphasizes the sessions that most support your school plan. For this reason, we also design and print a unique manual for each school’s workshop. If you choose to have us return for another workshop, we create the workshop and manual to reinforce the prior workshop while engaging staff in the new content.
